## Section 1: Interfacial Turbulence and Air–Water Scalar Transfer

|  |     |
|--|-----|
| Turbulence and wave dynamics across gas–liquid interfaces .....  | 1   |
| J. Hunt, S. Belcher, D. Stretch, S. Sajjadi, J. Clegg  |     |
| The calculation of the gas transfer between the ocean and atmosphere .....   | 13  |
| S.A. Kitaigorodskii  |     |
| The influence of wind wave breaking on the dissipation of the turbulent kinetic energy in the upper ocean and its dependence on the stage of wind wave development ..... | 29  |
| S.A. Kitaigorodskii  |     |
| Marvellous self-consistency inherent in wind waves — Its origin and some items related to air–sea transfers .....  | 38  |
| Y. Toba  |     |
| Near surface turbulence and its relationship to air–water gas transfer rates .....   | 51  |
| D. Turney, S. Banerjee   |     |
| Turbulent gas flux measurements near the air–water interface in an oscillating-grid tank .....   | 65  |
| J.G. Janzen, H.E. Schulz, G.H. Jirka   |     |
| Sensible and latent heat transfer across the air–water interface in wind-driven turbulence .....   | 78  |
| S. Komori, R. Kurose, N. Takagaki, S. Ohtsubo<br>K. Iwano, K. Handa, S. Shimada  |     |
| Rainfall-generated, near-surface turbulence .....  | 90  |
| J. Beya, W. Peirson, M. Banner   |     |
| Effects of the mechanical wave propagating in the wind direction on currents and stresses across the air–water interface .....   | 104 |
| S. Mizuno  |     |

|  |     |
|--|-----|
| Turbulent transport in closed basin with wind-induced water waves .....                  | 119 |
| M. Sanjou, I. Nezu, A. Toda  |     |
| PIV measurements of Langmuir circulation generated by wind-induced<br>water waves .....  | 129 |
| M. Sanjou, I. Nezu, Y. Akiya   |     |
| Study of vortices near wind wave surfaces using high-speed<br>video camera and MLS ..... | 138 |
| K. Takehara, Y. Takano, T.G. Etoh  |     |
| Wind wave breaking from micro to macroscale .....  | 151 |
| G. Caulliez  |     |

## **Section 2: Numerical Studies on Interfacial Turbulence and Scalar Transfer**

|  |     |
|--|-----|
| Validation of Eddy-renewal model by numerical simulation .....   | 165 |
| L.-P. Hung, C.S. Garbe, W.-T. Tsai   |     |
| Mass transfer at the surface in LES of wind-driven shallow water flow<br>with Langmuir circulation ..... | 177 |
| A. E. Tejada-Martínez, C. Akan, C.E. Grosch  |     |
| Characteristics of gas-flux density distribution at the water surfaces .....                             | 193 |
| W.-T. Tsai, L.-P. Hung   |     |
| Numerical simulation of interfacial mass transfer using the immersed<br>interface method .....           | 200 |
| P.G. Jayathilake, B.C. Khoo, Zhijun Tan  |     |
| Statistical approximations in gas-liquid mass transfer .....   | 208 |
| H.E. Schulz, A.L.A. Simões, J.G. Janzen  |     |

## **Section 3: Bubble-Mediated Scalar Transfer**

|   |     |
|---|-----|
| An inverse approach to estimate bubble-mediated air-sea gas flux from inert<br>gas measurements ..... | 223 |
| D.P. Nicholson, S.R. Emerson, S. Khatiwala, R.C. Hamme  |     |

|  |     |
|--|-----|
| Experimental setup for the investigation of bubble mediated gas exchange ····· | 238 |
| W. Mischler, R. Rocholz, B. Jähne  |     |
| Gas transfer velocity of single CO <sub>2</sub> bubbles ·····                  | 249 |
| R. Patro, I. Leifer  |     |
| Mass transfer across single bubbles ·····                                      | 262 |
| K. Loh, K.B. Cheong, R. Uittenbogaard  |     |
| Aeration of surf zone breaking waves ·····                                     | 273 |
| N. Mori, S. Nakagawa   |     |

#### **Section 4: Effects of Surfactants and Molecular Diffusivity on Turbulence and Scalar Transfer**

|  |     |
|--|-----|
| Modification of turbulence at the air–sea interface due to the presence of surfactants and implications for gas exchange. Part I: laboratory experiment ·····  | 285 |
| A. Soloviev, S. Matt, M. Gilman, H. Hühnerfuss<br>B. Haus, D. Jeong, I. Savelyev, M. Donelan   |     |
| Modification of turbulence at the air–sea interface due to the presence of surfactants and implications for gas exchange. Part II: numerical simulations ····· | 299 |
| S. Matt, A. Fujimura, A. Soloviev, S.H. Rhee   |     |
| Wind-dependence of DMS transfer velocity: Comparison of model with recent southern ocean observations ·····  | 313 |
| P. Vlahos, E.C. Monahan, B.J.Huebert, J.B. Edson   |     |
| A laboratory study of the Schmidt number dependency of air–water gas transfer ·····  | 322 |
| K.E. Richter, B. Jähne   |     |
| On transitions in the Schmidt number dependency of low solubility gas transfer across air–water interfaces ·····   | 333 |
| X. Yan, W.L. Peirson, J.W. Walker, M.L. Banner   |     |

## Section 5: Field Measurements

- An autonomous self-orienting catamaran (SOCa) for measuring air-water fluxes and forcing ..... 343  
P.M. Orton, C.J. Zappa, W.R. McGillis
- The 2009 SOPRAN active thermography pilot experiment in the Baltic Sea ..... 358  
U.Schimpf, L. Nagel, B. Jähne
- Observations of air–sea exchange of  $N_2$  and  $O_2$  during the passage of Hurricane Gustav in the Gulf of Mexico during 2008 ..... 368  
C.L. McNeil, E.A. D’Asaro, J.A. Nystuen
- The effect of high wind Bora events on water  $pCO_2$  and  $CO_2$  exchange in the coastal Northern Adriatic ..... 377  
D. Turk, B. Petelin, J.W. Book
- Seasonal sea-surface  $CO_2$  fugacity in the north-eastern shelf of the Gulf of Cádiz (southwest Iberian Peninsula) ..... 394  
M. Ribas-Ribas, A. Gómez-Parra, J.M. Forja
- Including mixed layer convection when determining air–sea  $CO_2$  transfer velocity ..... 406  
A. Rutgersson, A.-S. Smedman, E. Sahlée
- Air–sea carbon dioxide exchange during upwelling ..... 420  
H. Pettersson, K. K. Kahma, A. Rutgersson, M. Pertilä

## Section 6: Global Air–Sea $CO_2$ Fluxes

- Impact of small-scale variability on air–sea  $CO_2$  fluxes ..... 431  
R. Wanninkhof, G.-H. Park, D.B. Chelton, C.M. Risien
- The effect of wind variability on the air–sea  $CO_2$  gas flux estimation ..... 445  
N. Suzuki, S. Komori, M.A. Donelan
- Future global mapping of air–sea  $CO_2$  flux by using wind and wind–wave distribution of CMIP3 multi-model ensemble ..... 452  
Y. Suzuki, Y. Toba
- A Rumsfeldian analysis of uncertainty in air–sea gas exchange ..... 464  
M.T. Johnson, C. Hughes, T.G. Bell, P.S. Liss

## Section 7: Advanced Measuring Techniques

|   |     |
|---|-----|
| Accurate measurement of air–sea CO <sub>2</sub> flux with open-path<br>Eddy-Covariance .....      | 485 |
| O. Tsukamoto, F. Kondo  |     |
| Combined Visualization of wind waves and water surface temperature .....                          | 496 |
| R. Rocholz, S. Wanner, U. Schimpf, B. Jähne   |     |
| Microscopic sensors for oxygen measurement at air–water interfaces and<br>sediment biofilms ..... | 507 |
| B.C.G. Gonzalez, A.W. Lamon, J.G. Janzen, J.R. Campos, H.E. Schulz                                |     |
| Damping of humidity fluctuations in a closed-path system .....                                    | 516 |
| E. Sahlée, K. Kahma, H. Pettersson, W.M. Drennan  |     |
| Improved Optical Instrument for the Measurement of Water Wave Statistics<br>in the Field .....    | 524 |
| D. Kieffhaber, R. Rocholz, G. Balschbach, B. Jähne  |     |
| Friction Velocity from Active Thermography and Shape Analysis .....                               | 535 |
| C.S. Garbe, A. Heinlein   |     |

## Section 8: Environmental Problems Related to Air–Water Scalar Transfer

|   |     |
|---|-----|
| Evaporation mitigation by storage in rock and sand .....  | 545 |
| W.L. Peirson, G.A. Lee, C. Waite, P. Onesemo, G. Ninaus   |     |
| Development of oil–spill simulation system based on the global<br>ocean–atmosphere model .....                          | 559 |
| Y.J. Choi, A. Abe, K. Takahashi   |     |
| Structure variation dependence of tropical squall line on the tracer advection<br>scheme in cloud-resolving model ..... | 571 |
| Y. Baba, K. Takahashi   |     |
| High-resolution simulations for turbulent clouds developing over the ocean .....  | 582 |
| R. Onishi, K. Takahashi, S. Komori  |     |
| Author Index .....  | 593 |
